## Horseshoes

**Date:** 13/Apr/2016

**Measurement:** 10 x 20 Yards

**Time:** N/A:N/A

**Players:** 4

**Duration:** N/A

**Level:** U5 - 18+

**Objective:** Improve direction of both passing and receiving.

**Description:** Players aim to test opposition players touch by playing passes to the opposition player who has 1 touch to try & hit his cone with the ball.

If he hits the cone with his 1st touch he gets a point.

The team in possession now plays the ball to the opposite team for them to try & hit their cone in 1 touch. Each player takes a turn at both passing and receiving.

**Coaching Points:** Work on surface of foot to pass which is suitable to the distance the ball is being struck. Ensure the pass is suitable for the person receiving. As the players get older, they can increase the difficulty the pass is for the receiver, to test players & aid improvement.

**Progression:** Make distance of passes further apart to increase difficulty of passing and receiving. Vary types of pass to include inside foot, outside foot, laces, driven pass, chipped pass, lofted pass, swerve pass.
